Aircraft Photography: Critical Decisions No Margin For Error

Synopsis

Aircraft Photography: Critical Decisions No Room for Error is a collection of "on location" shooting missions and how I solved problems with unusual camera techniques. Still, movie, and video solutions in the corporate environment requires using smart ideas to accomplish your goal. Detailed solutions as simple as how to use a piece of paper and string, through modifying equipment and using reverse logic to accomplish a goal. Air to air shots depending on aircraft configuration are discussed and how to safely photograph a drone missile in the desert including recovery can be exciting as long as you don't step on a snake.

Customer Reviews

Even when entertaining is very outdated and not much use for modern air to air photography.

It's good if you are doing video, but no help for Digital Still Images. Does not cover DSLR for Air to Air Photography.
