TIME For Kids Big Book Of How (Time For Kids Magazine)

Synopsis

TIME For Kids The Big Book of How presents kids 8-12 years old with answers to the kinds of intriguing questions that appeal to their sense of curiosity. Colorful graphics, spectacular photos and clear, engaging diagrams will help answer such questions as: How does a chameleon change colors?; How can a person survive in the jungle?; How do you build a teepee?; How do diamonds form?; How do light sticks work?; How are 3-D movies made?; How do astronauts train for a space mission?; How do we get cavities?; How does solar energy work? Divided by subject area-from animals, the human body and technology to sports, food and green issues-kids will discover the background behind the questions through the book's photos, diagrams and art as well as its clear text. Of course, TIME For Kids goes beyond just answering the question, and engages kids with hands-on activities at the end of each chapter that bring life to a topic or idea they just read about. For example: If in the technology chapter kids learn how an airplane flies, the "How to" spread might include step-by-step instructions about how to fold a paper airplane or create a rotating helicopter. TIME For Kids The Big Book of How is a must-have book to satisfy the most curious of kids.

Book Information

Lexile Measure: 890 (What's this?)

Series: Time for Kids Magazine

Hardcover: 192 pages

Publisher: Time For Kids (June 7, 2011)

Language: English

ISBN-10: 160320184X

ISBN-13: 978-1603201841

Product Dimensions: 8.2 x 0.8 x 9.8 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 4.8 out of 5 stars [See all reviews](#) (113 customer reviews)

Age Range: 9 - 12 years

Grade Level: 3 - 7

Customer Reviews

How do elephants communicate? How can you make your house greener? How does an iceberg

form? How do they clean up after an oil spill? How is chocolate made? These are just a few of the questions your kids will answer when they read the Time for Kids Big Book of How! Not only will they read, they will experiment! The book contains over 500 facts kids want to know, plus easy to read, step-by-step instructions on how to find the answers through experimentation! One of the best things about this book is the rich color photographs and special attention to detail that is present on each page. My children ages 6, 7 and 9 have been seriously entertained by this book. It has been in our house for a little under a week and all three of my children have read, experimented, and thoroughly enjoyed it! These are the things they've done so far: My 7-year-old read the and created his own Rainforest (pg.94), which was an excellent science experiment teaching concepts of water vapor, the water cycle, and plant life in the rain forest. My 9-year-old read gHow is Ice Cream Made?h (pg 134) then involved both of her brothers in gHow to Make Ice Creamh (pg 138). Without any help, all three kids made and ate Vanilla Ice Cream with a few ingredients in a Ziplock Bag! How to Make Blubber (pg 24) was an immediate interest of my 7-year-old and is younger brother. This was a messy but interesting experiment that neither of them needed any help putting together. How to make a Baking Soda Boat (pg 104) was the experiment that occurred in our kitchen sink one morning. Whether they know it or not (they know!) this is Sir Issac Newton's Third Law of Motion!
