## Customer Reviews

I found this book to be too full of information to be a comfortable bedtime book, but my four year old son didn't seem to mind my skipping the words and just ooh-ing and aah-ing over the illustrations with him. My son also preferred my reading of it over his father's, because dad would get so absorbed in each page that he would forget to turn the pages! My son especially loved being able to know the names of all the parts of the jets and incorporated his new terminology in his play. This book is a definite must in any household with little pilots!

I use the book to show what is inside jet fighters at our military museum to young people who visit our model display room.
