My son LOVES mazes and is very good at them. This box has a mix of difficulty levels, but several of them are quite hard. Those, of course, are the ones my 6-year-old wanted to do first. I would recommend this book to older children (at least finished first grade). I wish the publisher would have put age recommendations. I managed to put the book up and will get it out again next year. More color would have helped make the book agreeable for more ages as well, not only making it more

attractive, but making following the maze passages easier.

Enjoyable but challenging mazes for abilities from Grade 1 to Grade 5...Easy to use as a center, and challenges the visual/spatial learner to excel. Each page is loaded with zany but true facts that will delight even the most reluctant learner!

As a teacher and father of a boy - this book provided hours of shared fun and opened the doors to exploring lots of subjects that we would never have encountered. My son could do the mazes alone - but we also worked together as a team - a wonderful benefit. We were both entertained and neither of us was bored!! A great book for a trip, to fill the time in waiting rooms, or as a special treat to work together on a rainy day.

I really enjoyed this because it's not your run-of-the mill maze book! The illustrations are lively and fun! Each maze is organized into themed chapter and includes interesting facts about the subject. As a teacher, I appreciate this because students learning new information while solving the mazes! The puzzles range in difficulty, so kids of all levels can feel successful.

This book is fun and amazing, great for parents and smaller kids to work on together and lots of interesting facts. The facts give readers impetus to go look things up...like Land Artist. Whoever heard of one of those, before reading this book?! I like the way it encourages reading as well as problem solving.

A unique and enjoyable maze book. My daughter is 5 and a maze freak and she really likes just looking through the maze books to see which maze she wants to tackle for the day and this book has a lot of choices and a variation in difficulty. I put stars at the top of the pages for the mazes she is allowed to do. I would recommend this book to a child over the Preschool age unless they are very talented with details. A first grader would probably love the book.

These mazes are quite complicated. I'm an occupational therapist and needed some less visually stimulating, simpler mazes for my elementary school aged kids. This would be great for a kid who REALLY loves and is good at mazes, not the kiddos I work with.

Very fun book for my son. He was almost 4.5 when he got the book and it lasted a few weeks until

he got them all done. He really loved it. A lot of the mazes were pretty easy, but a few of them had interesting rules that made them a little more challenging. My son is really good at mazes, so I'm not sure if it would be appropriate for most 4 or 5 year olds, but for an advanced maze kid it was great as it did not require amazing fine motor skills like books at the next level typically do. Basically, the mazes were somewhat complex, but the paths were fairly wide. All of the other books we have at this level or higher have very narrow paths and are exclusively in black and white. My son loves those too, but often accidentally crosses over paths do to less mature pencil skills. I highly recommend this book for a young maze lover.
