If you want to know how to practice homoeopathy, this is all you should need to read from the Founder himself. Forget Kent, Sankaran, Scholten, Sherr, Murphy, Herscu - this is the guy to read and learn from, Christian Samuel Hahnemann. Every answer to every question you may have will be found in this book and if you intend to study homoeopathy, this should be the very first thing you read. Not many people like the Boericke translation. I find it easier to read every year - yes, you should read it once a year (from cover to cover). Most prefer Kunzli or O'Reilly's editions, but I like Boericke. This little edition published in India is great for keeping in your handbag and carrying with you to read and re-read at your leisure. If you want a reference edition, without so many editorial glitches, get an edition published in America or the UK.

No Homoeopath can actually practise practically with out going thorough this bible which is one of it's own kind.

A good description of the difference between allopathic medicine and homeopathy. The author as the creator of the science of homeopathy. The law of similars and smallest dose are well described.

A very good resource for the student of homeopathy.

No homeopath can go without a classic Organon! Best book on my shelf!

This book really gave no information and was very difficult to understand.
