It's not often that a fact book looks like this. My daughter loves the bright colors and beautiful animals, and I love the well-researched info that she's learning. And it's so detailed we've only got through a couple pages! A great hit in our household for sure.

It's a beautiful book. I bought it for my 13 months baby and she loves it. Obviously, she can't follow the infos, but she is really into animals so she recognized some of them and learned others. I'm really happy with this book

There is no other word for it. This is quite simply a stunning book that every child over 4 should see. A younger child can enjoy the wonderful art of so many different animals, not just the usual ones but

exotic ones as well, and an older child will appreciate the written text with its descriptions of different animals found in different environments. Parents will enjoy and learn a lot from reading this as well.

My 8-year old daughter absolutely loves this book. The illustrations are beautiful, and she has spent a great deal of time reading about the different animals described inside (and teaching her parents about them!)

Gorgeous colors and illustrations yet facts for animals are not included when the animal appears with a number. Organizing text like this would make it more interesting and engaging when reading to young ones.

The most outstanding book I have ever seen, and a magical way of experiencing the natural world. An ideal family book for the holiday season

Cannot get enough of this book!! Such a gorgeous cover, and the illustrations inside are breathtaking.
