Times Tables The Fun Way Book For Kids: A Picture And Story Method Of Learning Multiplication

Synopsis

Times Tables the Fun Way teaches students to learn times tables with clever and colorful stories. It teaches all the 0's -9's times tables and has sold over 100,000 copies. Originally published in 1992, Times Tables the Fun Way has been a popular choice for schools and parents. To teach 6x6, for example, the story tells of twin sixes who go off to visit cousins across the desert. They get low on water and become very thirsty sixes, which sounds like 36, the answer to 6x6. Students love learning with the colorful pictures.

Customer Reviews

I've now done this book with 3 kids (a boy and 2 girls), and it's so easy and, yes, FUN. One girl was here visiting and picked it up because of the colorful cover and asked me to go through the book with her. She's a 5th-grade ESL student struggling in math. She was blown away at how easy this was and surprised herself at how well it helped her remember her facts. Even my 5yodd (who is also attracted to the colorful pictures and stories) remembers some of the facts. All the pages are sturdy un-bendable, water-resistant extremely heavy cardstock. It comes as a spiral-bound book so that you can bend it back and show the big picture (trigger) on one page while you read the (short)

story to them from the facing page. Each section has a little memory review and there is a pre/post test at the end to measure your progress. Also, as I stated before, the book is very colorful and fun to look at, so kids can't help picking it up and flipping through it. The student book is really the only thing you need (there are other bells and whistles, but they're not necessary) and well worth the price. Kids can read through this on their own and at their own pace. Whether they're learning all the facts from the beginning or brushing up on just a few that they just cannot seem to remember, this book can do it. A table of contents at the beginning tell them exactly what page to turn to to learn which fact. It is SSOOOO important that kids learn their facts cold before going into higher maths. Standardized tests are timed and they cannot get bogged down and side-tracked with what the answer to 7×8 is. I wish something like this was available when I was a kid.
