Customer Reviews

This book holds the attention of its intended audience beyond belief. The repetitious phrase, spoken by the would be monster, enables young readers to stay involved as they anticipate each animals incounter. Older readers can't wait to find out the monster's true identity. Best of all the illustrations don't give the monster's identity away until the appropriate time. All during the story it is evident the children's imaginations are whirling wildly. A must have for any teacher or reading volunteer.

My five-year old adores this book. It has great illustrations and an engaging story line about a monster hiding in the cave that turned out to be a tiny caterpillar. It is hillarious and involves child attention. After the first reading my son knows who is hiding in the cave and tries to reasure all the scared animals every time we read it. This book is a joy to read for both a parent and a child and has a great message that what we fear often turns out to be small issue.
