# Burkitt's Lymphoma (Current Cancer Research)

## Synopsis

The study of Burkitt's lymphoma is now in its 6 decade beginning with its discovery by Dr. Dennis Burkitt in equatorial Africa in the mid to late 1950's. A large body of information is available which provides a current understanding of the underlying molecular changes that are linked to the initiation and development of Burkitt's lymphoma. This proposed volume will provide a comprehensive view of Burkitt's Lymphoma from the diagnosis to potential animal models for this disease and include a view from physicians who have a up close view of the patients in populations where the disease is rampant. We expect that this will be an excellent resource for Medical students and faculty as well as educated laypersons who have a person interest in the disease.

## Book Information

Series: Current Cancer Research

Hardcover: 332 pages

Publisher: Springer; 2013 edition (December 6, 2012)

Language: English

ISBN-10: 1461443121

ISBN-13: 978-1461443124

Product Dimensions: 9.2 x 6.2 x 1 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)

## Customer Reviews

my late husband died from Leukemic Burkett's Lymphoma non-CNS. He experienced numb-chin-syndrome but his doctors did not uderstand the implications of that particular symptom. It turned out to be a tiny spot of the cancer hiding in the clavical bone behind the sinus cavity, too near the brain for treatment to be effective. He was treated with 6 rounds of hyper-CVAD and intra-theclal C. Remission was archived but two months later lumps formed on the top of his head like a goose egg and they said there was nothing more to do. He lived for 31 days after that. I wish I could have this book so I could see what is being done and I could understand this disease better. He was a

wonderful man and I miss him terribly.
