Customer Reviews

I got this for my daughter, we ordered all Spectrum books in January but this is the only one we had issues with. We had to use other books as well as the internet to answer a majority of questions since it doesn't go into great detail. I would have purchased a different book had I known this beforehand, she got frustrated because she was unable to find the answers in the book and had to look in different places to answer a somewhat easy question.

I thought there would be more info in here that I could use.. but really it's just an overview of world geography... I won't be using it... I love all the Spectrum books, but I think you can just find more

online than use this for 6th grade geography... Not what I was looking for.

This is a great product to use as a supplement to public school or we used this when we decided to home school our daughter. When she did go back to public school the next year she was on the same level and in some place higher than other kids within the grade level.

We use these workbooks as part of our homeschool program. These workbooks remind me of the pages we did in school 20+ years ago. Very simple to understand, direct and to the point. Would highly recommend.

I was looking for an easy geography curriculum to supplement our history studies. These Spectrum workbooks are perfect. They are easy to follow and my kids have learned a lot.

Awesome activities to for the new Tennessee social studies state standards. Can't wait to get started this year with it.

Says it is updated to Common Core. Not convinced. Looks a whole lot like the older version that I still have.

These are a great supplement to core standards. I homeschool and have found these very helpful.
